# Analysis of IPL 2025 Batters

**Name:** Nayini Aravind **ID:** 24127536

## 1.Introduction:

The IPL 2025 Batters dataset comprises comprehensive batting statistics for 200 individual players across 10 teams participating in the Indian Premier League 2025 season. Each record captures key performance metrics including team affiliation, runs scored, matches played, innings batted, not-outs, highest individual score, batting average, balls faced, strike rate, centuries, fifties, fours, and sixes. This dataset enables detailed performance analysis at both individual and team levels, facilitating insights into batting consistency, aggression, milestone achievements, and overall team strength. The aggregated team-wise summary reveals variations in scoring patterns, strike rates, and boundary-hitting capabilities across franchises, making it valuable for strategic analysis and performance evaluation.

## 2.Team-wise Batting Summary:

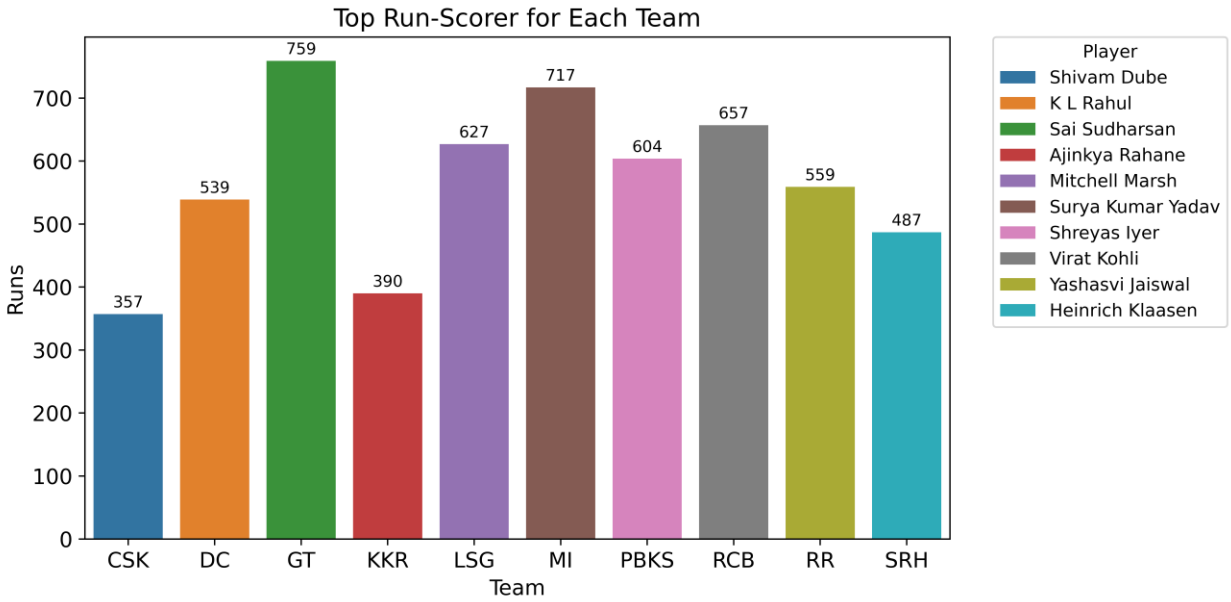
| Team | Runs | Avg Runs per player | Avg SR | 100s | 50s | Matches |
|---|---|---|---|---|---|---|
| PBKS | 3000 | 200.0 | 144.91 | 1 | 18 | 17 |
| MI | 2802 | 175.12 | 137.22 | 0 | 15 | 16 |
| GT | 2766 | 197.57 | 142.95 | 1 | 18 | 15 |
| LSG | 2598 | 173.2 | 140.85 | 2 | 19 | 14 |
| RCB | 2539 | 181.36 | 141.39 | 0 | 22 | 15 |
| RR | 2496 | 146.82 | 137.22 | 1 | 14 | 14 |
| DC | 2386 | 140.35 | 119.01 | 1 | 9 | 14 |
| SRH | 2378 | 169.86 | 129.77 | 3 | 8 | 14 |
| CSK | 2315 | 121.84 | 130.35 | 0 | 13 | 14 |
| KKR | 1886 | 125.73 | 123.56 | 0 | 7 | 13 |

Table Description:

This table presents a team-wise batting summary for all 10 IPL 2025 franchises, ranked by total runs scored. PBKS leads with 3000 runs, followed by MI (2802) and GT (2766). Key metrics include average runs per player, average strike rate, number of centuries and fifties, and matches played. SRH recorded the highest centuries (3), while RCB achieved the most fifties (22). The data reveals significant performance variations across teams in aggression, consistency, and milestone achievements throughout the tournament.

## 3.plots:

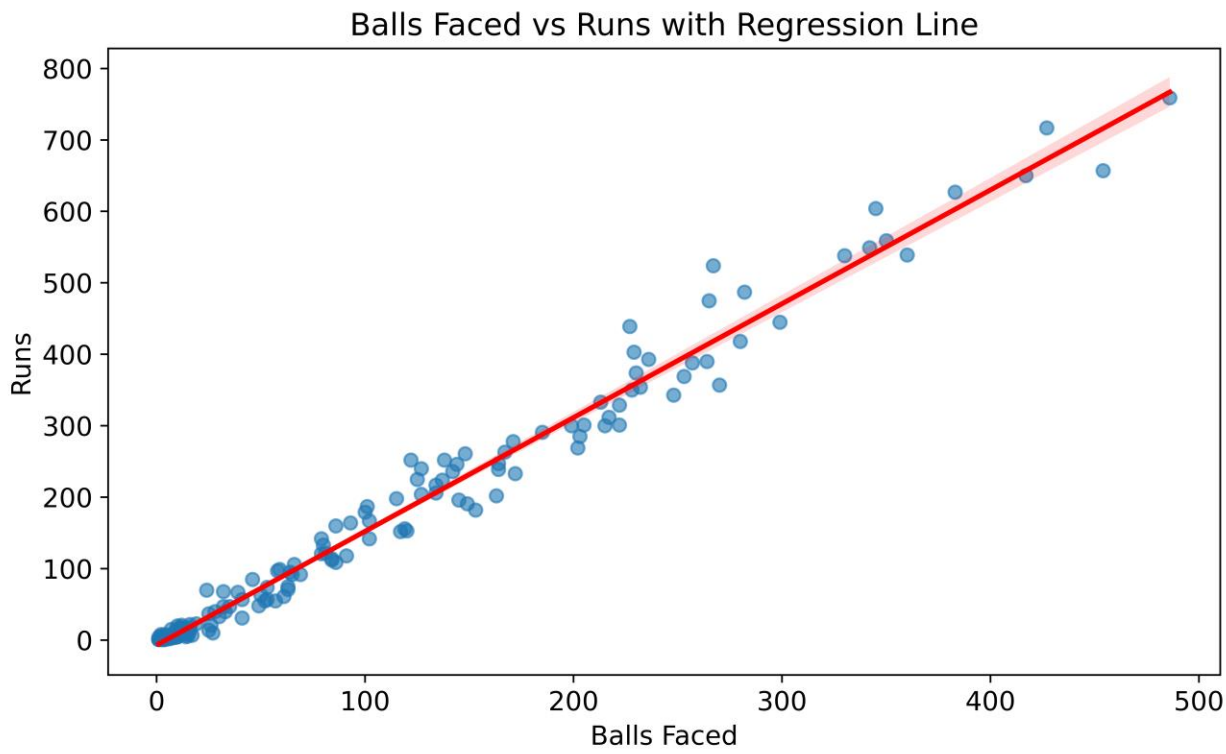
## 3.1. Top Run-Scorer for Each Team:



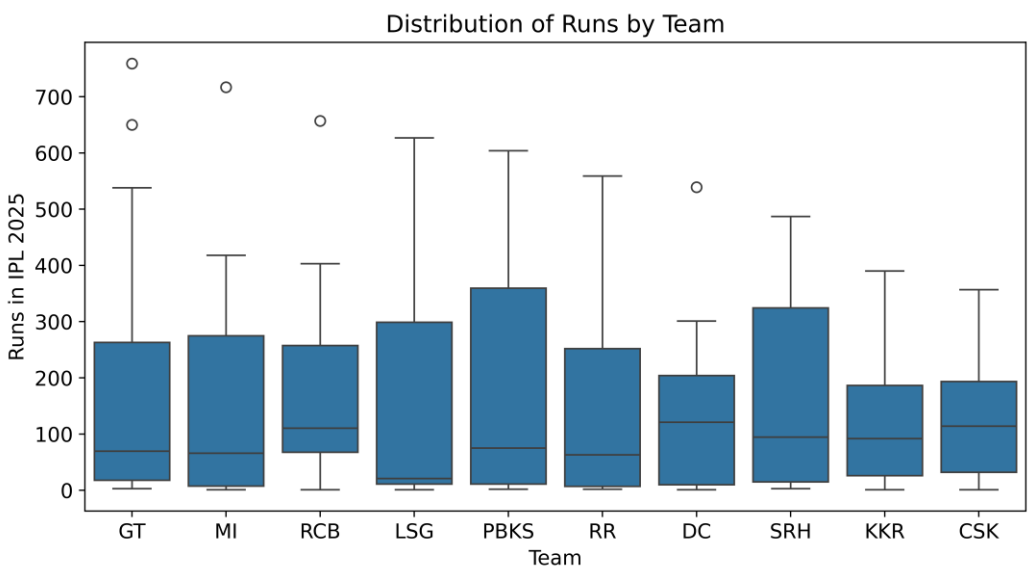
This bar chart displays the leading run-scorers from each IPL 2025 team and compares their total season runs. Each bar represents one key batter, with taller bars indicating a higher overall run contribution for that franchise. The graph clearly highlights which teams depended on a standout performer and which teams had comparatively lower peak individual scores, revealing differences in batting strength across teams.

## 3.2. Relationship Between Balls Faced and Runs:

This scatter plot shows how the number of balls faced relates to the runs scored by IPL 2025 batters, with each point representing one player. The upward-sloping regression line suggests a clear positive relationship: batters who face more balls usually score more runs. The spread of the points around the line indicates differences in scoring efficiency, where some players score faster or slower than others for a similar number of balls faced.



## 3.3 Team-wise Batting Run Distribution:



This box plot shows how runs are spread for batters in each IPL 2025 team. Each box gives the middle range of scores and the median, while points outside the box show unusually high or low scorers. Teams with higher boxes and medians have stronger batting contributions, whereas teams with lower, tighter boxes show weaker or more closely grouped scoring.

## 4.Summary:

The IPL 2025 batting analysis reveals significant performance variations across franchises. PBKS emerged as the best team, accumulating 3000 runs with the highest average strike rate (144.91) and exceptional batting depth. Sai Sudharsan was the tournament's best player, scoring 759 runs to lead all batters. Teams like GT and LSG demonstrated strong consistency, while KKR struggled with only 1886 runs. The data confirms a positive correlation between balls faced and runs scored, though strike rate variations highlight differing batting approaches. RCB achieved the most fifties (22), while SRH recorded the highest centuries (3), showcasing diverse scoring strengths across the competition.
